

What are Field Capable Clinical Services (FCCS) and Full Service Partnership (FSP) for Older Adults?

FCCS and FSP are designed to offer comprehensive mental health services for older adults age 55 and above, who may experience challenges accessing the traditional services due to their limited mobility, frailty or other limitations. These services address their emotional, physical and daily living needs.

Services are offered at a location convenient to older adults such as in their home, their community or offices of their health care providers.
